STRIKE READY

COGNITIVE SECURITY PLATFORM
DESIGNED TO OPTIMIZE AND CONSOLIDATE

Defenders need scale and simplicity, but the compounded problem of cyber-skill gap, talent shortage, ever increasing cyber vendors landscape and specialized expert systems have led to organizations to be more vulnerable. In fact, every security team struggles with deep understanding of every cybersecurity vendor's product's granular capabilities, its strengths and its weaknesses. In addition, this struggle gets compounded when these defenders are bombarded with alerts or other operational tasks, while they are dealing with the ever-changing threat landscape.

StrikeReady offers a powerful SaaS-based platform - Cognitive Security Platform that comes along with an Intelligent System - CARA (think J.A.R.V.I.S for cyber-security), which helps optimize, consolidate and operationalize organization's cyber-security technology stack to maximize the ROI, while the Intelligent System CARA assists defenders to quickly respond to incidents, proactively defend against emerging threats or operate at lightning speed while they perform any security operations centric task.

PLATFORM CAPABILITIES

ENTERPRISE-GRADE FOUNDATION
Designed to scale by leveraging a micro-services and a server-less architecture no matter the organization size.

AN INTELLIGENT SYSTEM – CARA
A DNA blend of an Incident Responder, a Threat Hunter and a Malware Researcher empowers the defender to analyze, reason, guide and resolve at lightning speed.

UNIFYING TOOLS, DATA, AND OPERATIONS
A vendor neutral approach offers seamless interoperability and a unified view for faster contextualization, analysis and prioritized remediation.

IMMERSIVE AND INTERACTIVE REPORTING
A built-in powerful business intelligence-reporting framework that helps comprehend data and interact with it naturally.

DESIGNED FOR ALL
Created for security teams no matter their size with multi-tenancy capability to meet the expectations of extremely complex environments.

COGNITIVE SECURITY OPERATIONS PLATFORM CONVERGES AI, DATA, AND AUTOMATION TO HELP THE DEFENDERS FOCUS ON DECISION MAKING AROUND EXCEPTIONS.
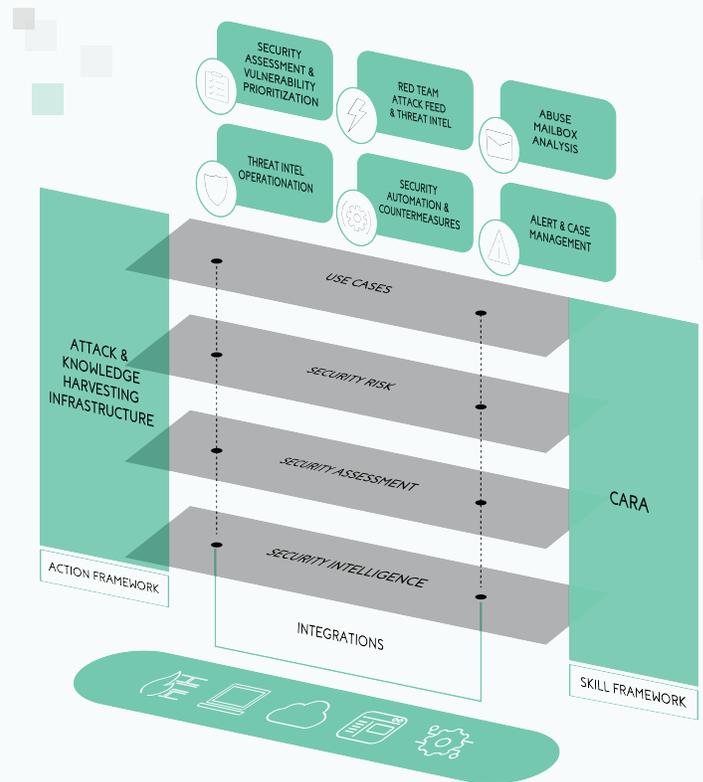

USE CASES

⚠️ **ALERT AND CASE MANAGEMENT**
Assists with alert prioritization, enrichment, analysis, resolution and the most neglected aspect - documentation.

🛡️ **THREAT INTEL OPERATIONALIZATION**
Operationalize IOCs and manage the entire life cycle across the layered security stack - what to apply, where to apply and when to retract.

⚙️ **SECURITY AUTOMATION & COUNTERMEASURES**
Gain real-time reasoning and decision making using institutional knowledge and practical experiences.

📋 **CONTINUOUS SECURITY ASSESSMENT AND VULNERABILITY PRIORITIZATION**
Execute true-to-life attacks and exploits, expose security gaps, validate security controls and apply countermeasure or prioritizing patching decisions.

⚡ **RED TEAM ATTACK FEED AND THREAT INTELLIGENCE**
Attain visibility into active in-the-wild attacks [commodity malware or nation sponsored] and IOCs to take a proactive stance on cyber security.

✉️ **ABUSE MAILBOX ANALYSIS**
Instantly analyze email for spam, malware or phishing and take actions.

KEY INTEGRATIONS

splunk>	QRadar	paloalto NETWORKS	cisco Cisco Umbrella	CROWDSTRIKE	FIREEYE
Microsoft Active Directory	Office 365	proofpoint	mimecast	Qualys	servicenow
resilient an IBM Company	FORTINET	Infoblox NEXT LEVEL NETWORKING	lastline		

STRIKEREADY IS BREAKING NEW GROUND IN SECURITY OPERATIONS WITH CARA AND GIVES VALUABLE TIME BACK TO THE SOC.

THE COGNITIVE INTELLIGENCE IS IMMEDIATELY AVAILABLE TO OTHERS RESULTING IN A MORE SKILLED AND A TRAINED WORKFORCE.

- ANDY BONILLO, CISO, CIENA

STRIKEREADY EMPOWERS OUR SECURITY ANALYST WORKFORCE, LESSENS THE PRESSURE AND BURNOUT, AND MOST IMPORTANTLY REDUCES BUSINESS RISK BY IMPROVING OUR MONITORING AND RESPONSE CAPABILITIES.

- DJ GOLDSWORTHY, IR. SECOPS AND

STRIKEREADY IS THE MOST TRANSFORMATIVE AND VALUE-RICH CYBERSECURITY TECHNOLOGY I HAVE SEEN IN A LONG TIME.

I HIGHLY ENCOURAGE EVERY CIO AND CISO TO ADOPT IT.

- JAMES RUTT, CIO, DANA FOUNDATION
